

## Custom Appliqué & Sports Lettering System

**Reduces costs**  
**Boosts output**  
**Increases profit**

- ▶ Easy to use
- ▶ Cuts up to 700 pieces per hour
- ▶ Creates sew disk instructions
- ▶ Cuts a wide variety of materials
- ▶ Connects to a PC just like a printer
- ▶ Works with popular drawing and embroidery programs

**Ioline 300 System**

# WOW your

- ▶ **Deliver finished goods faster.** There's no wait for pre-cut graphics nor left-over inventory.
- ▶ **Create custom designs quickly and economically.**
- ▶ **The Bears have a new short-stop? No problem.** Cut and sew little Jimmy's name on the spot—and pocket a profit.
- ▶ **Catch customers' eyes with unique combinations of color, texture and pattern.**
- ▶ **Offer affordable large designs.** Customers appreciate the more comfortable fit and improved launderability. And you save valuable production time and stitches.

# customers

... and keep them coming back

Customers love the look of appliqué for its more original and eye-catching appearance. Now you can create custom letters and decorative apparel graphics affordably in your shop using the Ioline 300 System.

The 300 System cuts twill, heat transfer material, ultra suede, even many fabrics found at the neighborhood sewing store. WOW your customers with designs from simple to sophisticated.

- ▶ Retain control over lead time, waste and production
- ▶ Quickly create affordable samples that help close orders
- ▶ Build loyalty and word-of-mouth referrals by tailoring designs for your customers
- ▶ Produce more products in less time with more profit

You don't need to be an artist to take advantage of the 300 System. Use existing graphic templates or create custom designs in CorelDraw!™, Adobe Illustrator™ or your embroidery program. The Ioline 300 System creates sew discs for most embroidery machines, including: Tajima, Melco, Barudan, Toyota, and Brother. The 300 System is virtually maintenance-free and easy to use. It hooks up to your PC just like a printer.

The 300 System has a rugged industrial design that performs day in and day out and comes with a lifetime free customer support commitment. At 75% less than the price of a laser cutter, Ioline customers often say the 300 System is one of the best investments they ever made in their business.

**“One of the best  
investments I’ve made.”**

— *J.D. Lettering & Sportswear  
Minnesota*

**“Learning is a breeze.  
I was cutting the day  
[my system] arrived.”**

— *Just in Stitches  
Minnesota*

**Double your output**

**Half the time**

**Half the stitches**

# Custom designs

1

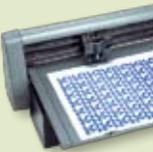

- ▶ Select a stock design or create your own in a vector-based drawing program like Adobe Illustrator™, Corel-Draw!™, or your embroidery software.

2

- ▶ Import the design into loline's 301 Software and select the number of copies to cut.

3

- ▶ Cut the design on the embroidery machine. It's as easy as using a printer.

## How to make sew disks

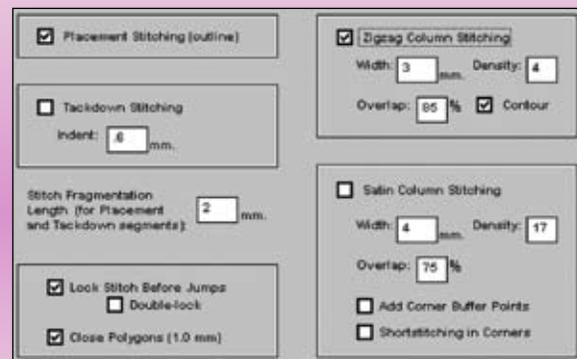

loline 301 Software provides stitch editing capabilities and creates outline stitch instructions for your embroidery machine. A typical 2-color

design (shown at below, left) can be completed in 5 minutes—as much as 20 to 50 minutes faster than with other digitizing programs.

A tutorial (in the manual) guides you through the process. After-sale support is available.

1. Import a stock design or an outline created in a vector-based drawing program (like Adobe Illustrator™ or CorelDraw!™) The design above takes about 2½ minutes to create.

2. Check your desired stitch styles: Placement, tack-down, zig zag, or satin. Use pre-set values for stitch width, density and edge overlap—or adjust values as desired. The 301 Software creates the stitch patterns automatically.

3. Need to make a disk? The 301 Software has a built-in disk editor to save designs in a format compatible with most embroidery machines. The 301 software also creates the disk format (Tajima, etc.) automatically.

# in 5 easy steps

Washington

## Time-saving techniques

Cut up to 9 layers as a single “kiss-cut” graphic

Make split front designs simply and easily

\* The 350HF System is required to cut chenille; chenille board; thicker leather; and fleece, denim or felt over 2mm. Pile, flock and stretchy knit materials are uncuttable on either machine. Contact Ioline Corp. for more information on the 350HF System.

## Cut a wide variety of materials

The Ioline 300 System handles materials from silk to fine glove leather. While some fabrics cut well naturally, others require a heat or pressure-sensitive coating or heat-applied backing (sold separately by Ioline) to prevent edge fray or improve bonding to the sticky sheet on the cutting tray.

If there is any question, Ioline engineers are happy to test materials for you. Simply send us sample yardage and a digitized design or description and size of the type of graphics you wish to cut. Some thicker materials, while uncuttable on the 300 System, may be perfectly fine on our higher down force machine, the 350HF.\* We'll help you select the best solution for your needs.
