

IMPORTANT: BEFORE YOU INSTALL

If your Ioline equipment has a separate circuit board assembly as shown below, please remove it before installing your new main circuit board. It is no longer necessary with the updated electronics in this kit.

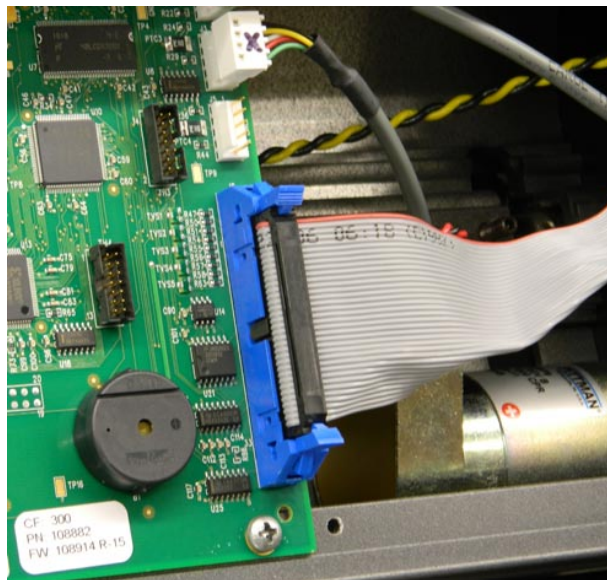

Remove the separate circuit board installed (shown below) and **DO NOT RE-INSTALL IT** when replacing the main circuit board. Re-use the screw to install the main board.

Secondary connector on separate circuit board.

Screw holding separate circuit board and main circuit board.

A properly installed main circuit board looks like this:

NOTE: Do not discard the removed circuit board in the trash. The solder contains lead and can contaminate landfills. *Recycle it where other electronic devices are collected or contact Ioline to return it for free recycling.*
