Ioline Corporation: Statement of Compliance with EUC REACH

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use (EC 1907/2006) entered into force on 01 June, 2007 and phased in until 2018.

Ioline products are considered “articles” as defined in REACH Article 3(3) and do not release a substance or mixture under normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1% in an article. Ioline does not use or add any SVHC above the 0.1% limit during the manufacturing process. Ioline is a Downstream User and dependent on upstream suppliers for registration of raw materials that fall under REACH requirements.

Ioline meets all applicable requirements as a Downstream User and producer of articles and is in full compliance with EUC REACH.

Please direct questions regarding Ioline REACH compliance to the individual listed below.
